TANGIBLE SECURITY

VIRTUAL CYBERSECURITY OFFICE (vCSO)

The Need for Experienced Cybersecurity Leadership

Today, demands for a savvy cybersecurity workforce is high - yet a shortage exists for the best personnel skilled in planning and dealing with enterprise level attacks. Compounded by high turnover rates with senior security executives (on average changing companies every 2 ½ years), **the gap in experience and competence continually widens** while you face a exponential growth in threats against your network, your data, and your employees.

The Tangible Security Virtual Cybersecurity Office (vCSO)

The virtual CISO or fractional CISO services has gained in popularity with enterprises and organizations that need a variety of experience or help with everything from pen tests, to security program development or assessment, to incident response planning. Virtual CISO services are often a fraction of the cost and is a cost-effective way of gaining expertise.

The Tangible vCSO is a comprehensive service that provides organizations enterprise-level resources to help manage, steer and execute the information security program. Using a team of diverse, experienced cyber security professionals, the vCSO fills the role of the CISO or security staff on an as-needed basis to assess, develop, manage and support your security framework and help execute a security program, resulting in a highly customized, tailored approach and providing maximum benefit.

Typical vCSO Services:

- Cyber and Risk Assessments
- Security Program Assessments
- Security Program Roadmap Planning
- C-Level Presentations
- Compliance Expertises
- Overview of Technologies/Personnel

Benefits of vCSO:

- Easy Access to Expertise
- Specialized Knowledge
- Flexibility
- Immediate Value
- Independent & Neutral
- Decreased Cost
